

# AGM Ultimate Engine Appearance HOW-TO

- 1) Dry fit all panels to get an idea of placement (they will somewhat auto locate themselves).
- 2) Clean all car surfaces with rubbing alcohol (VERY IMPORTANT!)
- 3) Install the center panel first.
- 4) Peel back approximately 1" of the red 3M tape covering on all strips of each panel.
- 5) Hold panel in place on vehicle and peel the tape covering slowly.
- 6) Press firmly down on all tape areas.
- 7) Proceed to install the remaining left and right panels using the same procedure.
- 8) Grab a beer and enjoy!
